

To Whom it May Concern,

I had a true privilege of working with Dejan during his tenure in Endava, as I was the one who originally hired him and watched him progress as one of our top front-end developers. Besides growing his technical skills, he also managed to establish himself as a community leader and a go-to person when it comes to help around React or other FE topics. He was also responsible for mentoring many juniors and a lot of them owe their first steps in software development to his expert guidance. Most importantly, he was always very easy to work with, and was always open to casual conversations around technical or non-technical topics. If I ever get a chance to work with him again, I would jump to the opportunity, a true asset to any company a great guy to boot!
