To Whom it May Concern,

It is my pleasure to recommend **Dejan Joksimovic** for any collaboration on Frontend software development area. I am Engineering Manager at Adobe and in the past 4 years I have worked with Dejan on a Product that we build. Over the years Dejan distinguished himself by engaging on difficult tasks, working hard to complete the work in time, helping his colleagues and most important proving extended Javascript and React knowledge. He acted as the main point of contact for all Frontend architecture changes and complicated implementations. He was the driver of the Frontend team and significantly improved our Product on the User Interface part so that will comply with high demanding requirements we have in Adobe.

Also, he proved clear and concise communication that helped him and his colleagues and stakeholders to efficiently reach the goals we've set.

In conclusion, I encourage you to work with Dejan and soon you will notice in facts the words I am expressing here.
